

The Redesigned AWI VAULT® Has Arrived

Elevated Performance, Simplified Installation

**The classic AWI VAULT® — now
with an insulated curb
for today's building demands.**

RPH is excited to introduce our brand-new AWI VAULT®. The new and improved system features a pre-insulated curb with R-41.9 thermal resistance integrated directly inside the curb, eliminating the need for separate ice wings or field-installed insulation. This design improves performance, simplifies installation, and brings measurable cost and sustainability advantages to every project.

AVAILABLE SIZES

Choose from **3 proven VAULT® configurations**,
Small, Medium, and Mega.

**NOW WITH A HIGHER
R-VALUE INSULATED CURB!**

KEY BENEFITS OF OUR NEW AWI VAULT®

- ✓ **Smaller Rooftop Footprint:** Eliminates the ice wing, freeing up valuable rooftop space.
- ✓ **Easier, More Reliable Installation:** Fewer steps, less coordination, faster installs and reduced error risk.
- ✓ **Material Cost Savings:** Fewer materials, less packaging waste and lower transportation costs.
- ✓ **Labor Cost Savings:** For the installers, it shortens install time by simplifying steps.
- ✓ **Higher R-Value with Built-In Performance Benefits:** Submittal documents and Revit® Design details are available upon request.
- ✓ **Reliable Performance:** Factory assembly delivers consistent thermal performance, avoiding variations in field-applied insulation.
- ✓ **Risk Reduction:** Lowers liability by reducing trade coordination complexity and installation errors.
