

**PROJECT PROFILE**

**Sandy Spring Bank Headquarters**

**CHALLENGE**

At the Sandy Spring Bank Headquarters, the need for a specialized custom sloped angle enclosure with wall vault presented a unique engineering challenge. The project required a solution that could efficiently protect wall penetrations while seamlessly integrating with the building’s design and providing uncompromising durability and performance.

**RESULTS**

RPH’s expert engineering team worked to create a tailor-made custom enclosure that precisely met their requirements. The custom sloped angle enclosure, complemented by RPH’s VAULT® product line, offered a consolidated, secure pathway for the wall penetrations. The result was an innovative solution that safeguarded the building’s envelope and enhanced its overall energy efficiency and longevity.

**PROJECT TYPE**

Bank

**SOLUTION USED**

Custom VAULT®

**SIZE OF UNITS**

18” x 18” x 32”

**NUMBER OF PENETRATIONS**

19 with 5000 Series RPH Exit Seals™

**TYPES OF PENETRATIONS**

HVAC and Electrical
